Mob No. 6375666573

A highly motivated and skilled MERN stack developer , Proficient in Using MongoDB , Express.js, React.js, and Node.js, to build scalable And robust application . Passionate about learning new technologies Keeping up-to-date with the latest trends in web development

PROJECT

studyNotion — details

May 2023 - June 2023

It is an online education platform built using tech - mern stack , where Instructor

Can create a course and student can get a course by payment gateway razorpay , student can see which course he enrolled , and instructor

Also viewed enrolled students and their progress as well as ..etc

This Project developed in four phases

Phase-1, frontend—

In this phase we create login, signup, course, about , contact page, cart , otp page , reset password page, email sending page , etc using react package - redux, redux-toolkit , axios , react-router-dom, Concurrently , react-icon ..etc

Phase-2, Backend—

This phase is API development phase we develop lots of API -

Payment gateway razorpay , cloudinary API for media , course add update create delete API , authentication API login signup , otp and email related

Etc, using package of - cookies parser , cloudinary , nodemailer, jsonwebtoken , otp generator, etc

Phase -3 , database and media management —

In this phase we use MongoDB Atlas for our data management and Media like video and image we use Cloudinary

Phase -4 , Hosting application —

Host soon for now this is developing phase

SKILLS

- MERN stack development

- MongoDB

- Express.js

- React.js

- Node.js

- JavaScript

- Git

- HTML/CSS

SOFT-SKILL

- Creativity.
- Time management
- Teamwork skills.
- Problem-solving.
- Adaptability.
- Leadership.
- Interpersonal skills.
- Communication
- Work ethic
- Attention to detail

LANGUAGES

JavaScript ,

C++ ,

Java ,

... etc

EDUCATION

Dsa , Location — *Remote*

June 1 2022- sep 2022

I learn alot from this course my mentor - Love babbaer ,

How can we write a code in sufficient way and time and space complexity..
etc

MERN Stack, Location — *Remote*

January 2023- june 2023

How a website make fully frontend and backend and database

I learn from this course
